Quality Seeds for Assured Return...

NARMADA

IMPROVED PADDY

Plant height : 110-115 cm
Duration (140-145 days)
Medium Bold Grain
Productive tillers per plant (8-10)
Wider adaptability for Kharif
Panicle Length : 22-24 cm
Resistance to Blast, Tolerance to BPH Sheath Blight

BRD-101

IMPROVED PADDY

Plant height : 100-105 cm
Duration:140-150 days
Coarse Grain
More grains per panicle
Wider adaptability for Rabi
Tolerance to Stem Borer, Leaf Folder,

KALIA

IMPROVED PADDY

Plant height : 100-110 cm
Duration : 155-160 days
Medium Bold Grain (Brown)
More Productive tillers per plant
Suitable for both Kharif
High Yielding

POOJA GOLD

IMPROVED PADDY

Plant height : 100-105 cm
Long Duration (140-145 days)
Medium Bold Cylinder
Productive tillers per plant (11-14)
Wider adaptability for Kharif
Good milling 68-70%
Resistance to BLB with good
Tolerance for Disease
High Yield Variety

SAMPADA

IMPROVED PADDY

Plant height : 95-100 cm
Duration : 140-145 days
Short Bold Grain type (like 7029)
More Productive tillers per plant
high yielding varieties
suitable for kharif seasons
Tolerance for Major Pest & Disease

MINAKSHI

IMPROVED PADDY

Plant height : 105-110 cm
Duration (145-150 days)
Long Slender Grain
Productive tillers per plant (8-10)
Wider adaptability for Kharif
Good milling 65-67%
Resistance to Blast, Tolerance to BPH, WHPH and Leaf Folder

JAYRAM

IMPROVED PADDY

Plant height : 110-115 cm
Duration : 140-145 days
Super Fine Short Cylinder Grain
More Productive tillers per plant
Tolerance to Stem Borer, Leaf folder, Blast and Sheath Blight

SUBHADRA

IMPROVED PADDY

Plant height : 105-110 cm.
Duration: 140-145 days
Medium Bold Grains
More productive tillers per plant
Good cooking quality
Tolerance for Major Pest and Disease.

BRD-444

IMPROVED PADDY

Plant height : 100 -110 cm
Duration : 155-160 days
Medium Long Grain
More Productive tillers per plant
Suitable for both Kharif
High Yielding

VAISHNAVI GOLD

IMPROVED PADDY

Plant height : 95-100 cm
duration : 115-120 days
Medium Bold Grain
Suitable for both Kharif and Rabi
High Yielding Varieties
Tolerance for Major Pest & Disease

KALA CHAMPA

IMPROVED PADDY

Plant height : 100 -110 cm
Duration : 155-160 days
Medium Bold Grain (Brown)
More Productive tillers per plant
Suitable for both Kharif
High Yielding

BALAJI 28-28

IMPROVED PADDY

Duration : 135-140 days
Short Bold Grain Type (Brown Colour)
High Yielding Varieties
Suitable for Kharif Seasons
More Grain for Small Panicle.

KAMAKHYA

IMPROVED PADDY

Plant height : 95-100 cm
Duration (145-150 days)
Medium Slender Grain like Swarna
Productive tillers per plant (8-11)
Wider adaptability for Kharif
Good milling 68-70%
Long panicle grain with high yielding

PRIMEUM OP PADDY

We specially produced under close supervision and maintain High Quality Standards. We also process the seed under the best machinery to maintain top physical of the seeds.
MTU-7029, MTU-1001, Pooja, MTU-1010, MTU-1156, Mahamaya, IR-64

SUPER PLUS

IMPROVED PADDY

Plant height : 110 -115 cm
Duration : 135-140 days
Fine Medium Cylinder Grain
More Productive tillers per plant
Tolerance to Stem Borer, Leaf folder, Blast and Sheath Blight

PARSURAM-11

IMPROVED PADDY

Duration : 130-135 days
Long Slender Grain
Non-Loading Varieties
Suitable for Kharif
Tolerance for Major Pest and Diseases.

BRD-444

IMPROVED PADDY

Plant height : 100 -110 cm
Duration : 155-160 days
Medium Long Grain
More Productive tillers per plant
Suitable for both Kharif
High Yielding

VAISHNAVI GOLD

IMPROVED PADDY

Plant height : 95-100 cm
duration : 115-120 days
Medium Bold Grain
Suitable for both Kharif and Rabi
High Yielding Varieties
Tolerance for Major Pest & Disease

KALA CHAMPA

IMPROVED PADDY

Plant height : 100 -110 cm
Duration : 155-160 days
Medium Bold Grain (Brown)
More Productive tillers per plant
Suitable for both Kharif
High Yielding

BALAJI 28-28

IMPROVED PADDY

Duration : 135-140 days
Short Bold Grain Type (Brown Colour)
High Yielding Varieties
Suitable for Kharif Seasons
More Grain for Small Panicle.

KAMAKHYA

IMPROVED PADDY

Plant height : 95-100 cm
Duration (145-150 days)
Medium Slender Grain like Swarna
Productive tillers per plant (8-11)
Wider adaptability for Kharif
Good milling 68-70%
Long panicle grain with high yielding

PRIMEUM OP PADDY

We specially produced under close supervision and maintain High Quality Standards. We also process the seed under the best machinery to maintain top physical of the seeds.
MTU-7029, MTU-1001, Pooja, MTU-1010, MTU-1156, Mahamaya, IR-64

SUPER PLUS

IMPROVED PADDY

Plant height : 110 -115 cm
Duration : 135-140 days
Fine Medium Cylinder Grain
More Productive tillers per plant
Tolerance to Stem Borer, Leaf folder, Blast and Sheath Blight

PARSURAM-11

IMPROVED PADDY

Duration : 130-135 days
Long Slender Grain
Non-Loading Varieties
Suitable for Kharif
Tolerance for Major Pest and Diseases.

SABRI

IMPROVED PADDY

Plant height : 110 -115 cm
Duration : 120-125 days
Super Fine Short Cylinder Grain
More Productive tillers per plant
Tolerance to Stem Borer, Leaf folder, Blast and Sheath Blight

WINNER

IMPROVED PADDY

Plant Height : 95 -100 cm.
Duration : 115-120 days
Long Cylinder Type Grain (like 1010)
Suitable for Kharif and Rabi
1000 Grain Weight (25.5 grams)

BRD-21

IMPROVED PADDY

Duration : 120-125 days
Long Cylinder Type Grain
Medium Tall Long Panicle with more grain and lodging resistance.
Varieties tolerance for Major Pest and Disease.

GOVINDA-264

IMPROVED PADDY

Plant height : 95-100 cm
Medium duration : 120-125 days
Medium Bold Grain
Productive tillers per plant 11-14
Wider adaptability
Suitable for both Kharif and Rabi
Tolerance for Major Pest & Disease
Excellent in Test

BAHUBALI-222

IMPROVED PADDY

Plant Height : 95 -100 cm.
Duration : 115-120 days
Long Cylinder Type Grain (like 1010)
Suitable for Kharif and Rabi
1000 Grain Weight (25.5 grams)

BRD-555

IMPROVED PADDY

Duration : 120-125 days
Long Cylinder Type Grain
Medium Tall Long Panicle with more grain and lodging resistance.
Varieties tolerance for Major Pest and Disease.

CHANDRA

IMPROVED PADDY

Plant height : 90-95 cm
Medium duration : 115-120 days
Long Cylinder Grain
Suitable for both Kharif & Rabi
High Yielding varieties
Tolerance for Major Pest and Disease

BALWAN

IMPROVED PADDY

Plant Height : 95 -100 cm.
Duration : 115-120 days
Long Cylinder Type Grain (like 1010)
Suitable for Kharif and Rabi
1000 Grain Weight (25.5 grams)

VARDAAN

HYBRID PADDY

Plant height : 100 -120 cm., medium tall
compact & erect plant type.
Duration (135-140 days)
Medium Slender Grain
High productive tillers per plant (12-15)
More grains per panicle (240-310)
Wider adaptability
More than 70% milling
HRR (Head Rice Recovery) : 64%

BHM-1081

HYBRID MAIZE

Medium maturity hybrid
Suitable for Rabi Season
Uniform long cobs
Medium cob placement
Yellow, semi-dent kernels
High-Shelling percentage

SIDDHI

HYBRID PADDY

Plant Height : 95 -120 cm., Semi-dwarf
compact & erect plant type.
Medium duration :115-120 days
Long Slender Grain
High productive tillers per plant (12-15)
More grains per panicle (275-300)
Wider adaptability
More than 70% milling
HRR (Head Rice Recovery) : 65%

SULTAN

HYBRID MAIZE

Early maturity hybrid for green cob.
More peduncle length.
Medium cob placement.
Yellow-Orange, semi-dent kernels
Suitable for Inter-Cropping
Green cob will be ready by 65 days.

BHOLENATH

HYBRID PADDY

Medium maturity with 120-130 days
Non lodging and non-shattering
High Productive tillers per plant (6-8)
Medium Slender Grain
Good cooking quality.
High yield potentiality with > 60 % HRR
Tolerant to Major Pests & Diseases and suitable for closer planting

BHM-1041

HYBRID MAIZE

Medium maturity hybrid
Suitable for Kharif Season
Uniform long cobs
Medium cob placement
Yellow, semi-dent kernels
High-Shelling percentage

BHP-0468

HYBRID PADDY

Plant height: 120-130 cm. Semi tall
Non Lodging, Non shattering
Duration: 120-125 days
Medium Bold Slender Grain
High productive tillers per plant
More Grains per panicle
Recommended for irrigated areas, but suitable even for protected rainfed areas
HRR (Head Rice Recovery) : > 50%

BHAGWATI-303

IMPROVED WHEAT

Plant height : 100-110 cm
Sowing time : Oct-Nov
Profuse tillering
Duration :125-130 days
Very attractive shiny golden colour grains
Tolerant to stem & leaf rust
Very good yield potentiality
Excellent dough quality for chapati

VAISHNAVI

IMPROVED PADDY

Plant height : 90-95 cm
Medium Duration : 120-125 days
Medium Bold Grain
Productive tillers per plant 11-14
Wider adaptability
Good milling %
Tolerance for Major Pest & Disease

VIJETA

IMPROVED PADDY

Duration : 130-135 days
Medium Tall Plant
Medium Long Cylinder
More productive tillers per plant
Tolerance to Major Plant Diseases
High Yielding Variety

RADHIKA

IMPROVED PADDY

Plant height : 90-95 cm
Semi dwarf
Duration : 115-120 Days
Long Cylinder Grain
Suitable for both Kharif and Rabi
Suitable for Irrigated Medium Land
Resistant to Sheath Blast, BLB and Sheath Rot

KOHINOOR

IMPROVED PADDY

Plant height : 90-95 cm
Medium duration : 100-105 days
Medium Long Grain
Productive tillers per plant 11-14
Wider adaptability
Tolerance for Major Pest & Disease
High Yielding Variety

MAMATA

IMPROVED PADDY

Plant height : 90-95 cm
Semi dwarf
Duration : 115-120 days
Medium Slender Grain
Suitable for both Kharif and Rabi
Suitable for Irrigated Medium Land
Tolerance for Major Pest & Disease

SHYAM

IMPROVED PADDY

Plant height : 95 - 100 cm
Duration : 90-95 days
Short Bold Grain
More Productive tillers per plant
Suitable for both Kharif & Rabi
Tolerance for Major Pest & Disease

MADHAV

IMPROVED PADDY

Plant height : 90-100 cm
Semi dwarf
Duration : 110-115 days
Short Bold Grain Type Swarna
Suitable for both Kharif and Rabi
Suitable for Irrigated Medium Land
High Yielding Variety

RADHA GOLD-333

IMPROVED PADDY

Plant Height : 75 - 80 cm
Semi dwarf, non lodging plants
Duration : 100-105 days
Fine long Slender Grains
Suitable for both Kharif & Rabi
Tolerant to Major Diseases
Excellent in cooking quality
